University Goals and Interests

Schools with enrollments of 5,000 and below are much more likely to offer small classes taught by involved, accessible professors, a real sense of community, attention to you as a person, and better access to activities. Smaller colleges also often have better records for getting their undergraduates into graduate schools. The downside of attending a small college is a smaller number and variety of courses and activities that are offered. Students who seek personal connection and involvement are likely to feel more at home at a small college.

Schools with over 10,000 students are more likely to offer an abundance of undergraduate classes and majors. At large colleges, there are more activities and organizations in which to get involved. Some of the downsides include many classes with 200 – 1,000 students, limited access to certain courses, activities, and Varsity sports teams. Often the focus of a large university is more on research and graduate students than undergraduates. Students who like to be anonymous in a setting, who are self-starters and can take care of themselves without much support are likely to feel at home at a larger campus.
