In which academic area (math, science, history, English, Spanish, etc.) do you do best? Is this subject the easiest for you? Why do you think you do well in this subject? (Answer can be more than one)

Business - One of the easiest probably out of the all core subjects. I think I do well in this subject mainly because it mostly requires logic and understanding major concepts.

Maths - Not the easiest, but I do well enough in this subject. It is so, because it mainly requires logical thinking and I'm quite good at it.

Which academic subject do you enjoy the most? Why do you enjoy it? \*

I enjoy doing maths mainly because I get a sense of satisfaction when solving challenging questions.

Which academic subject do you enjoy the least? Why don't you enjoy it? \*

PPKn - boring

- ☐ Over 20,000

## University Goals and Interests

Schools with enrollments of 5,000 and below are much more likely to offer small classes taught by involved, accessible professors, a real sense of community, attention to you as a person, and better access to activities. Smaller colleges also often have better records for getting their undergraduates into graduate schools. The downside of attending a small college is a smaller number and variety of courses and activities that are offered. Students who seek personal connection and involvement are likely to feel more at home at a small college.

Schools with over 10,000 students are more likely to offer an abundance of undergraduate classes and majors. At large colleges, there are more activities and organizations in which to get involved. Some of the downsides include many classes with 200 – 1,000 students, limited access to certain courses, activities, and Varsity sports teams. Often the focus of a large university is more on research and graduate students than undergraduates. Students who like to be anonymous in a setting, who are self-starters and can take care of themselves without much support are likely to feel at home at a larger campus.
