In which academic area (math, science, history, English, Spanish, etc.) do you do best? Is this subject the easiest for you? Why do you think you do well in this subject? (Answer can be more than one)

- Math as I am pretty good at problem solving and looking at different ways of solving problems
- English as I enjoy writing, looking at and analysing different pieces of literature
- Business as I am able to understand different concepts easily as I started my own business and thus have learned from my experiences.

Which academic subject do you enjoy the most? Why do you enjoy it? *

I enjoy Chemistry as it is really interesting, English because I enjoy writing and Business because it is fun and I get a lot of freedom and liberty in terms of projects, presentation and collaboration

Which academic subject do you enjoy the least? Why don't you enjoy it? *

I enjoy most of my subjects

Personal Interests and Extracurricular Activities

What are your most important hobbies (including unusual hobbies) and activities? *

I enjoy painting, reading books and solving the rubik's cube

Extracurricular activities starting Grade 9 / Year 10 both in and outside of school. Please indicate how long you have been involved in them, awards or special recognition, leadership positions, and their relative importance to you.

1. School clubs and other non-sport activities:

- I was in the student council and math club in grade 9 of my old school
- Part of the Lasallian council in my new school
- Currently in the process of applying for the Service Council
- I have started my own service initiative which will be included in the CCA list where my team and I work with a group of high schoolers in eastern Indonesia to help them start their own business and introduce them to the importance of entrepreneurship and social media marketing

2. School and non-school sports:

- Basketball club in grade 9 and 10

3. Volunteer and community services:

- The service project I mentioned about working with high schoolers in eastern Indonesia
- Currently in the process of working with a team to develop an app called Muzartt that aims to provide music and art therapy for older adults with dementia.

4. Work and internship experiences:

- Started my own business called Knocknock which markets Singaporean products to Indonesian customers (started in 2020, still running)

5. Summer activities starting with Grade 9 / Year 10 (camps, school or college programs, etc.):

Grade 9 - ID Tech
Grade 10 - LaunchX

Are any of these activities particularly important for you in your college planning? Would you like to pursue one or more of them at a higher level? Which ones? *

Yes, I am really passionate in my service initiative that allows me to work with students my age in eastern Indonesia, I think it is really important that they receive quality education about business and for them to be able learn life skills and develop as independant individuals and entrepreneurs. I really think by introducing them to the benefits of technology and social media, they may be equipped to turn not only their life around, but also the wellbeing of their community. I want to be able to widen the reach of my initiative and spread this knowledge to children in less fortunate conditions.

I am also really looking to grow Muzartt and make sure the app can be up and running as when conducting the market research, I've realised how many people actually need it and how important it would be.

What's something that you're really good at that no one else knows about? *

Since I just moved to a new school, not a lot of people know that I'm a good writer and how much I enjoy it.

University Goals and Interests

What kind of college or university do you see yourself in? Given what you know about yourself and your current goals and priorities, please provide some idea of the kind of college experience you envision. It's OK if you're not sure what you want yet – that's part of the college admissions process! If you don't know, or don't care too much at this stage, feel free to say so.

Where would you like to go to college? What countries (or cities) are you interested in? *

The US

List the five most important things you are looking for in a college (in order of preference): *

Prestige, Community, Internship opportunities and connections, Balance between school life and having fun, Safety

- ☐ 5,000 – 10,000
- ☐ 10,000 – 20,000
- ☐ Over 20,000

University Goals and Interests

Schools with enrollments of 5,000 and below are much more likely to offer small classes taught by involved, accessible professors, a real sense of community, attention to you as a person, and better access to activities. Smaller colleges also often have better records for getting their undergraduates into graduate schools. The downside of attending a small college is a smaller number and variety of courses and activities that are offered. Students who seek personal connection and involvement are likely to feel more at home at a small college.

Schools with over 10,000 students are more likely to offer an abundance of undergraduate classes and majors. At large colleges, there are more activities and organizations in which to get involved. Some of the downsides include many classes with 200 – 1,000 students, limited access to certain courses, activities, and Varsity sports teams. Often the focus of a large university is more on research and graduate students than undergraduates. Students who like to be anonymous in a setting, who are self-starters and can take care of themselves without much support are likely to feel at home at a larger campus.
