# THE ASPECTS OF TOP UNIVERSITY PREPARATION

#TakeOnYourFuture #ItsALLinThePrep

**The unique positioning and impactful aspects** that make a student's qualities stand out in admission.

**Analyzing overall grades**, course rigor at school and the required standardized tests to match with the targeted universities' level of competitiveness.

**A required skill** needed to clearly communicate student's personal brand in university application and to excel in higher education.

Exploration is essential to identify **what to pursue in the future** and, therefore, allows student to **choose the right major while developing his/her CV at the same time**.

Note:

*Our Assessment & Recommendation will be categorized based on these aspects*

# INITIAL ASSESSMENT REPORT

# OVERALL ASSESSMENT

## CURRENT STANDINGS

### Exploration

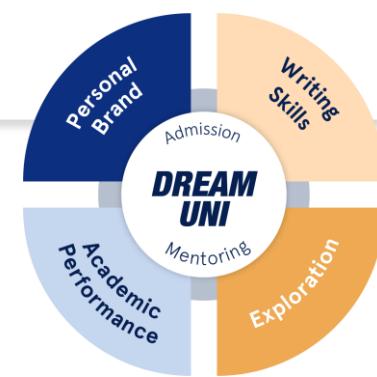

You have many interests, and **have been actively exploring these interests** via competitions, school club/ organizations, and community services. **You are off to a good start**. However, considering your academic interest is **Food Science/Tech**, you **have NOT really had any activities explorations closely related to the subject**.

### Personal Brand

**Your personal brand is a little all over the place.** In other words, your profile only shows that you have many interests, but **there are no visible distinctive quality that would "hook" the admission officers** yet. Several aspects that are worth considering are **debate & writing, your EDM and upbeat music preference, and your cause in mental health**. Note that **these have yet to show your Food Science/Tech quality**.

### Academic Performance

You have a **good performance**, but there are **still room for improvements**. It is also good that you have several accomplishments in debate and writing.

#TakeOnYourFuture #ItsALLinThePrep

## AREAS OF IMPROVEMENT

### Passion/Interest Exploration

Despite your interest in Food Science/Tech, **you have NOT really done any significant exploration into the field**. Therefore, **you need more exposures to their career paths, the details on the fields of study, and some technical experiences to name a few**.

Note that, if you are open to it, **you should also try to explore other fields to further confirm your academic interest** in Food Science/Tech. You can start by exploring science (specifically biology-related) projects, activities, and/or organizations.

You also need to **sharpen both your soft skills and hard skills related to Food Science/Tech (as well as other fields that may be of your interests)**, which will be crucial for your passion/interest explorations.

### Summary:

*You are off to a good start in terms of exploring your interests and seem to have shown a strong attachment to Food Science/Tech, but you are still lacking activities that would showcase your interests in the field. Thus, you need to do further explorations to both confirm your interests in Food Science/Tech and develop your skills in the field.*

## Admission factors chart to determine your university admissions competitiveness level.

Top Ivy Level

Ivy to Semi-Ivy Level

Top Private Level

Top State Level

Selective School

Less Selective School

Overall

GPA & Course Rigor

Standardized Test Scores

Activities & Awards

Note:

Your current overall admissions factors show that you are currently well-suited for **Selective Level** schools. Do NOT worry, however, because you can still improve these status depending on future performance. Also note that you haven't taken the SAT/ACT, thus, the assessment here was rather dragged down.

## HOW TO POSITION YOU IN A UNIQUE MANNER FOR UNIVERSITY APPLICATION

***“Personal Brand is one or two sentences that student would like the admissions committee to remember about.”***

*Your current personal brand is still lacking the “hook” factor that makes it unique. This is mainly due to your many interests and, thus, you need to start narrowing down your interests and concentrate on several (1 or 2) interests and passion that matters to you the most. Things to emphasize when developing your personal brand would be the WHY Food Science/Tech (which needs further exploration) and WHO you are in terms personality and non-academic passion (which might be debate/writing and mental health).*

Your main focus within the next TWO years is to ***gain exposures on the potential career paths in Food Science/Tech***; work on ***personal projects*** related to these fields; and ***participate in activities*** that are directly relevant to your personal and academic interests to develop your personal brand.

Note:

## OUR METHOD

We will guide you to be **more proactive** in searching for existing extracurricular activities inside and outside of school or start a new club that reflects your passion and interest to help **develop your experience and skills** (and ultimately your personal brand).

## RECOMMENDED ACTIVITIES

- ***Creating clubs/organization outside of school.*** This acts as starters for organizational and leadership experience. Note that you have started this for community service and just need to follow through and commit more time to it.
- ***Join competitions:*** *Nutrition Live Online Awards 2021, Nutrition Competition by HOSA, Big Science Competition, Schools Science & Innovation Competition*
- ***Recommended Field for Personal Projects:*** Food Science/Tech-related projects, such as the following:
  - Build a Calorie meter App
  - Build a Diet planning App
  - Create a Healthy Lifestyle Campaign
  - Writing diet recipes

Note:

## OUR METHOD

We will provide you with access to our exclusive network with professionals in Food Science/Tech and perhaps other fields that may be of your interest if you are open to it.

## RECOMMENDED ACTIVITIES

- *Reading books / follow online publication that are related to Food/Technology or other genres of your choice*
- *Join Experiential Learning programs over the holiday in exploring for your passion and interest as well as building your resume.*
- *Connect with various professionals in the field of your interest to discover what the careers in the field you're interested in is all about: this can be in the form of networking, talks/seminars, and job shadowing.* This would be an eye-opening experience that may contribute to determining your major.

Note:

## THE IMPORTANCE OF WRITING SKILLS

You need a tool to communicate your qualities in your university application. Our experiences have taught us that students from national-curriculum schools have the tendency to need more help in English writing. Improving your English writing skills will enhance your personal brand through a well-articulated and creative writing style. Writing skills will also train your critical thinking and organize your thought process for your daily assignments in university.

### ASPECTS

- University Application Essay
- Letter Of Recommendation Request
- CV Writing
- Email Communication
- School Assignment And Papers

### RECOMMENDATION TO IMPROVE YOUR WRITING

- Develop a good reading habit
- Read and learn about officially published essays
- Try analyzing reading materials and write a summary

Since writing is one of your main passion, we believe that your writing skills are already at least in the intermediate level. However, just to be sure, you should provide your English writing samples to us for review by our English writing team to further assess your current writing level.

Performance

Note:

You may take our **SAT Diagnostic Test** and join our **SAT Course** for improvement if needed.

## ACADEMIC

To improve and maintain your performance and aim for > 38 IB score. If possible, further develop your academics by joining academic competitions (especially Biology-related) and make a significant accomplishment in them.

## STANDARDIZED TEST

### TOEFL/IELTS:

Top universities expect their prospective students to score **above 100 on TOEFL iBT test or above 8.0 on IELTS**. TOEFL/IELTS scores are **valid for TWO years**.

We **highly recommend** that you take the TOEFL/IELTS test next year (**first half of 2022**)

### SAT/ACT:

Top universities, especially US Universities, look for students who score **>1450 on the SAT or >32 on the ACT**. SAT and ACT Scores are **valid for Five years**.

We **highly recommend** that you take the SAT test as soon as possible (**May 2021 or after July 2021**).
