THE ASPECTS OF TOP UNIVERSITY PREPARATION

#TakeOnYourFuture #ItsALLinThePrep ALLin

The unique positioning and impactful aspects that make a student's qualities stand out in admission.

Analyzing overall grades, course rigor at school and the required standardized tests to match with the targeted universities' level of competitiveness.

A required skill needed to clearly communicate student's personal brand in university application and to excel in higher education.

Exploration is essential to identify *what to pursue in the future* and, therefore, allows student to *choose the right major while developing his/her CV at the same time*.

INITIAL ASSESSMENT REPORT

Exploration

You've decided to major in **Computer Science**. You love math and coding and have created a math club in school, as well as started learning programming.

Areas of improvement:

Deepen your exploration in these areas by creating a personal project, scaling up your math club, and doing internships. Also talk to professionals to get a better idea of the different career paths you can take.

Academic Performance

Your grades have been falling recently, but you've won gold and silver medals at various international math competitions.

Areas of improvement:

Focus on improving your grades, as Asian unis will prioritise them over your other activities. Keep participating in competitions and try to join programming-related ones to develop your skill there too!

Personal Brand

Your current personal brand is 'A math whiz with a passion in helping his peers thrive in math competitions.'

Areas of improvement:

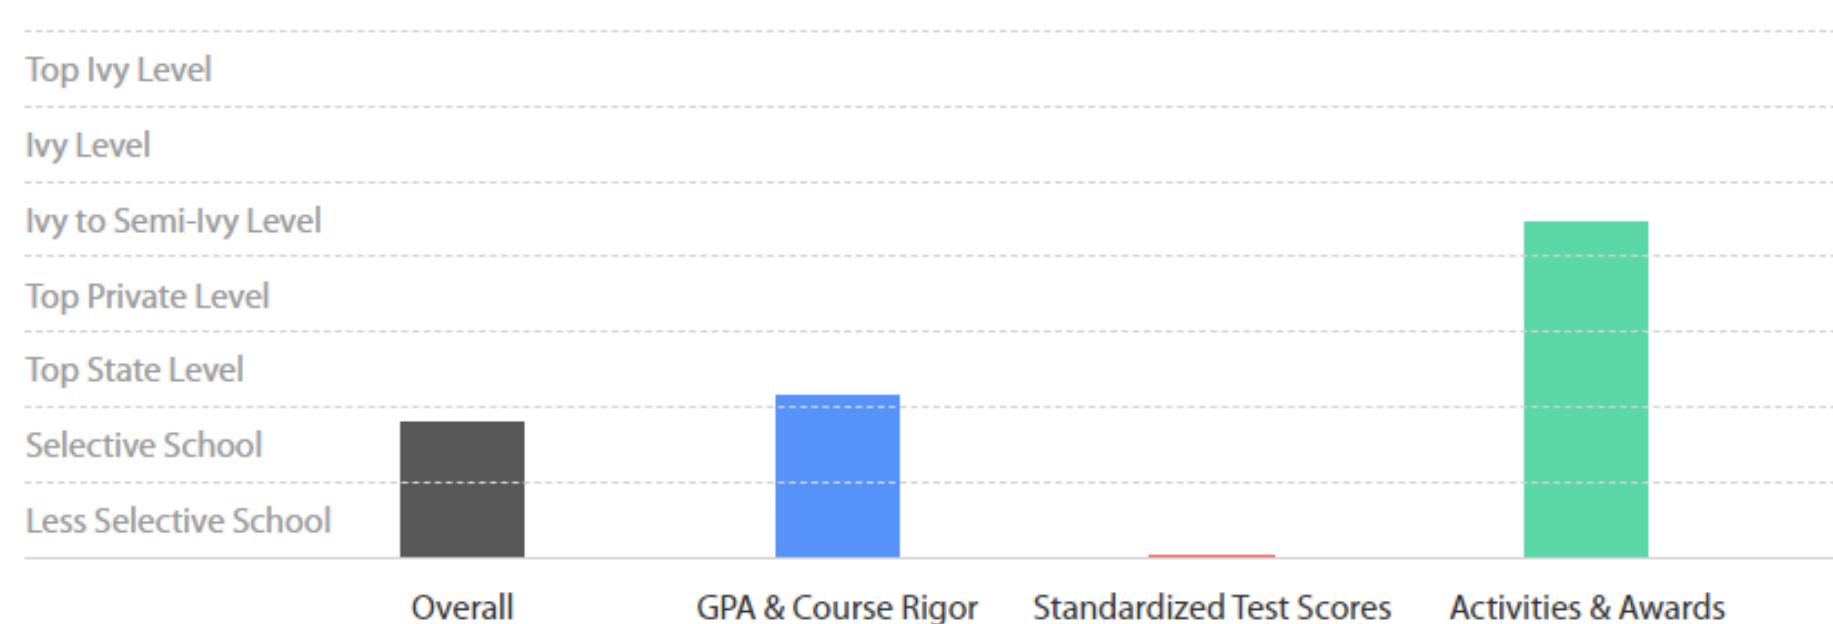

We can see your brand starting to take shape, but you need to scale up your activities and gain practical experiences to drive it home. You have just under a year to do this, which should be enough time. We do not recommend taking a gap year just to further build your profile.

Writing Skill

Send us your recent writing samples for review by your mentor and our essay editors to assess your current writing ability.

Tristan's current competitiveness level

Your current profile shows you are suited for **Selective** schools. You can improve your chances by improving your grades and increasing your activities and awards. Also note that you have not taken any standardized tests yet and, thus, your competitiveness level is currently underestimated.

OUR METHOD

We will guide you to be **more proactive** in searching for existing extracurricular activities (inside and outside of school) or start a new club that reflects your passion and interest to help **develop your experience and skills** (and ultimately your personal brand).

RECOMMENDED ACTIVITIES

- *Join competitions:*

Competition	Field
<ul style="list-style-type: none">➤ DOKA Competition➤ International Collegiate Programming Contest➤ CodeChef➤ Future Problem Solving Program International➤ International Olympiad in Informatics➤ Kick Start	<ul style="list-style-type: none">➤ Mathematics➤ Programming➤ Programming➤ Creativity and Problem Solving➤ Informatics➤ Programming

- *Suggestions for Personal Projects:*

- Program a simple math game. Depending on your skills and the target market of the game, it could be simple enough for kids to play, or something that your fellow math enthusiasts would enjoy playing

THE IMPORTANCE OF WRITING SKILLS

Your application essays are often the only way for you to express yourself to the admissions committee. This is why writing skills are just as important as the other aspects.

ASPECTS

Aspects that will demonstrate your writing skill in applications and at university include:

- University application essays
- CV
- Email communication with future employers, professors, etc.
- School assignments

RECOMMENDATIONS TO IMPROVE YOUR WRITING

- Read regularly & critically to learn different writing styles, new vocabulary, and develop critical thinking.
Ask our mentors for suggestions on what to read!
- Start keeping a daily journal

ACADEMIC

There are two types of standardized tests: college readiness (eg. SAT/ACT) and English proficiency (eg. TOEFL/IELTS).

STANDARDIZED TEST

TOEFL/IELTS:

Top universities expect their prospective students to score **above 100 on TOEFL iBT test or above 8.0 on IELTS**. TOEFL/IELTS scores are **valid for TWO years**.

We **highly recommend** that you take the TOEFL/IELTS test **this Summer**.

SAT/ACT:

Top universities, especially US Universities, look for students who score **>1450 on the SAT or >32 on the ACT**. SAT and ACT Scores are **valid for Five years**.

We **highly recommend** that you start preparing for your first SAT test **by August 2022**.

FUTURE COMMITMENTS FOR SCHOLARSHIP AWARDEE

- Serving as a student ambassador at events
- Serving as a speaker to share Tristan's experience as an scholarship awardee
- Helping with ALL-in mentoring activities (once Tristan finished the mentoring program)

SUCCESS STORIES

Admission Mentoring

Neuroscience

University of Pennsylvania Student

Valencia Kandilla

Valencia joined ALL-in when she was already in Grade 12 and already had a lot of activities on her plate in the beginning, but not much related to her interest in biology and neuroscience. She followed through with suggestions of things she needed to do such as joining more research competitions even though she already had school activities lined up in her final year.

Even though she has big interests in STEM, she already has stellar writing skills that helped her a lot in her application. Valencia always responds fast and sends her revised essays quickly when it comes the time for the application process. Her personal branding as an aspiring neurologist who is keen to combat dyslexia through digital media & photography shines through her essays. That landed her into 13 top universities, including UPenn, UCLA, King's College London, and University of British Columbia and finally put her decision to University of Pennsylvania. She's currently enjoying her first year as a Neuroscience student, which is something that she loves to do and we love her for that!

Darren Lee

Darren's passion in political science and social issues shows from his participation in 7 extracurricular, 2 community services, 3 work experiences during high school including the Model United Nations, Student Council, also environmental and wildlife conservation communities. Despite his interests that look serious, he's a fun person that loves to play drums and guitar, swim, run in marathons, and joke around with his peers. Darren is someone who can make the most of his time by engaging in meaningful activities that match his passion but also having fun during his high school days.

Darren is a person who always grabs opportunities and is willing to carve his path to achieve his dreams by working harder than others. This spirit continues until the university admission period, where aimed for a scholarship if he wants to study in the US. All of his efforts paid off when he received the Regents' and Chancellor's Scholarship and Koshland May Scholarship for UC Berkeley with around 0,2% acceptance rate! With these scholarships, Darren is able to study with full scholarship at UC Berkeley and is currently enjoying his first year as a Political Economy student.

Film Producing

University of South California

Alysha Wang

From dancing to swimming to filmmaking, our first impression of Alysha was that she is a very multi-talented person. Despite her busy schedule of dancing classes and swimming practices, she surprisingly excelled in her academic performance as well! We see Alysha as someone who loves to try something new and can pick up new talent as she goes. When it comes to the time for the university application process, she was initially aiming for middle-ranked universities to learn about filmmaking. However, seeing her potential, we encouraged her to try to apply for USC even though she was very doubtful at first. Alysha took the challenge and started preparing her application to USC.

The School of Cinematic Arts has an earlier 1.5 months deadline than other schools in USC. For 2 months, Alysha wrote 6 essays (2 of which required 1000 words), a short video, screenwriting, and other short essays. It wasn't an easy journey, but it has brought her to one of the most state-of-the-art film schools in Los Angeles!
